

## California Sun Dried Nectarines

### DESCRIPTION Vari-Grade

---

The nectarines are washed, cut and pitted, then carefully laid on drying trays, sulfured (for color retention and as a preservative), and laid in the California sun to dry. The nectarines are removed from the trays, sorted, cut, packaged, and stored. The nectarines used are grown locally in the California San Joaquin Valley and the sun drying process locks in the intense fruit flavors.

### QUALITY FACTORS

Color, Flavor	Practically uniform orange with red characteristic of sun dried nectarines. Typical intense nectarine flavor; no spoiled, rancid, or off flavors.
Defects	Practically free of imbedded dirt, or other foreign material. Dark units and some discoloration may be present. May contain pit or pit fragments.
Cut Size	Halves - Size according to grade Varigrade packed to match pre-sale sample or customer's requirement.

### ANALYTICAL

Sulfur	< 5000 ppm
Moisture	15% - 30%
